Nuclear Engineering and Design 134 (1992) 381–382
North-Holland

# Contents of Volume 134

## CONTENTS OF ISSUE 134(1)

Editorial, *K. Kussmaul* ix

**Extended and Updated Selected Papers from the SmIRT–10 PRINCIPAL DIVISION LECTURES**
**August 14–18, 1989, Anaheim, California, USA**

Preface, *K. Kussmaul* xi

Advances in computational mechanics, *J. Donea and T. Belytschko* 1
Advancements in the behavioral modeling of fuel elements and related structures, *M.C. Billone, R.O. Montgomery, Y.R. Rashid and J.L. Head* 23
Advances in the analysis of fast reactor core and coolant circuit structures, *Y.W. Chang, D.T. Eggen, A. Imazu and M. Livolant* 37
Developments in fracture mechanics and non-destructive examination, *S.J. Crutzen, R.W. Nichols, K. Kussmaul and G. Yagawa* 59
Advances in the analysis and design of concrete structures, metal containments and liner plate for extreme loads, *J.D. Stevenson, J. Eibl, M. Curbach, T.E. Johnson, M.A. Daye, J.D. Riera, N.J. Krutzik, J. Nemet and K.T.S. Iyengar* 87
Advances in the mechanical and thermal design of fusion reactors, *G. Grieger* 109
Advances in structural reliability, *G.I. Schueller and A.H.-S. Ang* 121
Advances in probabilistic safety assessment, *G. Apostolakis and P. Kafka* 141

Announcement: ICOSSAR'93 149

Instructions to contributors 151

## CONTENTS OF ISSUE 134(2&3)

**Extended and Updated Selected Papers from the 17th WATER REACTOR SAFETY INFORMATION MEETING**
**October 23–25, 1989, Gaithersburg, USA**

Preface, *K. Kussmaul* i

U.S. nuclear industry perspective on accident management, *D.J. Modeen and R.N. Oehlberg* 153
The consequences of water ingress into the primary circuit of an HTR-Module – From design basis accident to hypothetical postulates, *G.H. Lohnert* 159

Performance of containment penetrations under severe accident loadings, *M.B. Parks and D.B. Clauss* 177
Assessment of primary water stress corrosion cracking of PWR steam generator tubes, *V.N. Shah, D.B. Lowenstein, A.P.L. Turner, S.R. Ward, J.A. Gorman, P.E. MacDonald and G.H. Weidenhamer* 199
Use of *J–R* curves in assessing the fracture behavior of low upper shelf toughness materials, *E.M. Hackett and J.A. Joyce* 217
Heavy-Section Steel Irradiation Program summary, *W.R. Corwin, R.K. Nanstad, S.K. Iskander and F.M. Haggag* 227
Managing aging in nuclear power plants, *J.A. Christensen* 245
Good practices for effective maintenance to manage aging of nuclear power plants, *W.B. Scott, W.I. Enderlin, A.D. Chockie and K.A. Bjorkelo* 257
Loss-of-Coolant Accident (LOCA) testing of aged cables with application to nuclear plant life extension, *M.J. Jacobus* 267
A systems engineered approach towards improved safety and performance of valves, *H.G. Knoedler* 277
Evaluation of check valve monitoring methods, *H.D. Haynes* 283
Paleoliquefaction studies along the Atlantic seaboard: Implications for long-term seismic hazard, *D. Amick, R. Gelinas, D. Moore, E. Billington and G. Maurath* 295
Parametric study of relay seismic capacity, *K. Bandyopadhyay and C. Hofmayer* 311
Human factors survey of advanced instrumentation and controls technologies in nuclear plants, *R.J. Carter* 319
The effects of local control station design variation on human performance and plant risk, *J. O'Hara, J. Higgins, W. Luckas and D. Crouch* 331
Improving safety through an integrated approach for advanced control room development, *K. Haugset, Ø. Berg, S. Bologna, N.T. Førdestrømmen, J. Kvalem, W.R. Nelson and N. Yamane* 341
Toward risk-based control of nuclear power plant configurations, *P.K. Samanta, W.E. Vesely and I.S. Kim* 355
Cognitive environment simulation: a tool for modeling intention formation for human reliability analysis, *D.D. Woods, H.E. Pople, Jr. and E.M. Roth* 371
